PROFESSIONAL SUMMARY

Computer Science Engineering student (CGPA: 8.54) with a strong foundation in Python, Django, SQL, and Data Structures & Algorithms. Delivered measurable contributions across two software development internships, engineering functional applications, debugging code, and building responsive interfaces. Proven builder of end-to-end systems — from ESG analytics tools to intelligent recommendation engines — seeking a Software Engineer / GET role to drive innovative engineering solutions.

TECHNICAL SKILLS

- **Programming & Frameworks:** Python, Django
- **Databases & Backend:** SQL, Relational Database Design
- **Web Technologies:** HTML5, CSS3
- **Core CS Fundamentals:** Data Structures & Algorithms, Object-Oriented Programming, Computer Networks, Operating Systems
- **Tools & Platforms:** Git, GitHub, Linux (Ubuntu), VS Code, Jupyter Notebook

PROJECTS

ESG Sustainability Analysis System

03/2025 – 07/2025

Stack: Python, Django, SQL

- Engineered a data analytics system to evaluate Environmental, Social, and Governance (ESG) metrics, enabling structured, data-driven sustainability assessment.
- Architected a reporting pipeline that consolidated raw ESG datasets into structured, decision-ready reports, streamlining the data organization workflow.
- Applied SQL-based data modeling to structure and query ESG metrics efficiently, improving reporting accuracy and turnaround.

Ikigai Career Guidance System

09/2025 – 02/2026

Stack: Python, Django

- Designed and implemented a decision-logic recommendation engine based on the Ikigai framework to generate personalized career-path suggestions from user inputs.
- Built an intuitive, user-centric interface that simplified the career exploration workflow, improving usability for end users.
- Translated a multi-factor career framework into predefined logic rules, demonstrating strong analytical and problem-decomposition skills.

WORK EXPERIENCE

Software Development Intern — Cloud Logic

02/2025 – 03/2025

- Engineered and tested Python- and SQL-based software applications, following industry-standard development best practices.
- Debugged and validated application code to enhance functionality, improving overall software reliability and quality.
- Implemented feature enhancements collaboratively within an agile development workflow.

Web Design & Development Intern — Web Makers

12/2025 – 01/2026

- Engineered responsive, cross-browser web pages using HTML5 and CSS, delivering user-friendly, visually polished interfaces.
- Collaborated with a development team to design, test, and debug production web pages across the full development lifecycle.
- Optimized UI layout consistency and responsiveness across devices through structured front-end development practices.

EDUCATION

B.E., Computer Science Engineering — IFET College of Engineering

09/2023 – 04/2027

CGPA: 8.54 / 10

HSE (Bio-Maths) — St. Joseph Higher Secondary School

06/2022 – 03/2023

Percentage: 85%

CERTIFICATIONS

- **Cisco Networking Academy / NDG** — Linux Essentials
- **Cisco Networking Academy** — Introduction to Networks
- **Simplilearn SkillUp** — Git and GitHub Certification
- **Elewayte** — Web Development
- **Scalar** — Mastering Python Essentials

ACHIEVEMENTS

- 1st Prize — Gen Z Thesis Paper Presentation, New Prince Shri Bhavani College of Engineering & Technology
- 1st Prize — Logic League, Annual VIBES'26, IFET College of Engineering
